

'Globetrotters' Year 6 Autumn 2018

As Historians we will be studying the ancient civilisation of the Mayans. We will be learning about significant events that happened during this period, contrasting the cultural differences and beliefs between then and now.

Linked to this, our work as Geographers will involve studying the continents of North and South America. We shall look at the human and physical differences between the two, as well as comparing them to our own.

As Scientists we will be investigating the properties of light, exploring how light travels and how it is reflected and refracted.

As Artists, we will be analysing the self-portraits of Mexican artist Frida Kahlo and using this as inspiration for our own. We shall also be creating 3D artefacts, linked to traditional Mayan examples.

In Computing, we will be returning to the visual programming language Scratch. Using the context of games development, we will explore how to design, write and debug programs and understanding how simple algorithms work.

In Music, we will be composing a song linked to our work on refugees, linking it to the BBC Ten Pieces project.
